

ADDENDUM REPORT

Committee Meeting Date: 14th March 2023

Application ID: LA04/2022/1479/F

Proposal:

Partial redevelopment of former Kennedy Way Waste Water Treatment Works to include the development of new Mechanical & Electrical (M&E) workshops, storage, changing facilities and ancillary offices (development to include three new buildings 1) the main hub building; 2) a store to hold an alternative bottled water supply; and 3) a generator store), access improvements, parking, service yards, storage areas, contractors compound, boundary fencing, cesspool, solar PV panels and landscaping.

Location:

Former NI Water Ltd Sewage Treatment Works Blackstaff Road Belfast BT11 9DT

Referral Route: Major Development

Recommendation:

Approve subject to conditions

Applicant Name and Address:

Northern Ireland Water NI
Westland House
40 Old Westland Road
Belfast
BT14 6TE

Agent Name and Address:

Resolve Planning & Development
Innovation Factory
Forthriver Business Park
385 Springfield Road
Belfast
BT12 7DG

Background

This application was deferred for a site visit by the Planning Committee on 14 February 2023 to allow Members the opportunity to undertake a site visit. The Committee site visit took place on 24 February 2023.

The Committee should read this Addendum Report in conjunction with the original full planning report, appended.

Recommendation

As per the previous Committee report, the recommendation to approve subject to conditions remains unchanged.

Delegated authority is sought for the Director of Planning and Building Control to finalise the wording of conditions.

Development Management Officer Report Committee Application

| Summary | |
|---|---|
| Committee Meeting Date: 14 February 2023 | |
| Application ID: LA04/2022/1479/F | Target Date: |
| Proposal: Partial redevelopment of former Kennedy Way Waste Water Treatment Works to include the development of new Mechanical & Electrical (M&E) workshops, storage, changing facilities and ancillary offices (development to include three new buildings 1) the main hub building; 2) a store to hold an alternative bottled water supply; and 3) a generator store), access improvements, parking, service yards, storage areas, contractors compound, boundary fencing, cesspool, solar PV panels and landscaping. | Location: Former NI Water Ltd Sewage Treatment Works Blackstaff Road Belfast BT11 9DT |
| Referral Route: Major Development | |
| Recommendation: | Approve subject to conditions |
| Applicant Name and Address: Northern Ireland Water NI Westland House 40 Old Westland Road Belfast BT14 6TE | Agent Name and Address: Resolve Planning & Development Innovation Factory Forthriver Business Park 385 Springfield Road Belfast BT12 7DG |
| Executive Summary: This application seeks full planning permission for the partial redevelopment of former Kennedy Way Waste Water Treatment Works to include the development of new Mechanical & Electrical (M&E) workshops, storage, changing facilities and ancillary offices (development to include three new buildings 1) the main hub building; 2) a store to hold an alternative bottled water supply; and 3) a generator store), access improvements, parking, service yards, storage areas, contractors compound, boundary fencing, cesspool, solar PV panels and landscaping. The site comprises the site of the former Kennedy Way Waste Water Treatment Works which ceased use in 2000. The key issues to be considered in the assessment of this application are: <ul style="list-style-type: none"> The principle of the proposed use at this location Impact on the character and appearance of the area Compatibility with adjacent uses Access, parking and traffic management Environmental Considerations – Drainage, Contamination, Noise, Impact on Designated Sites/Natural Heritage Assets NI water (applicant) advise that the existing NI Water ‘Bretland House’ facility must be cleared to facilitate the main extension of the Belfast Waste Water Treatment Works at Duncrue which is a | |

key and strategic outcome of the DFI-led Living With Water Programme (the Belfast Strategic Drainage Infrastructure Plan) and that the Kennedy Way Hub proposal forms a fundamental part of the works required to upgrade the Belfast WWTW at Duncrue, the proposal is therefore of strategic importance to both NI Water and the Department for Infrastructure led Living With Water Programme (LWWP).

Consultees are content with the proposal subject to conditions and no third party objections have been received.

Recommendation

Having regard to the development plan, relevant policy context and other material considerations, the proposed development is considered acceptable and it is recommended that full planning permission is granted subject to conditions.

Delegated authority is sought for the Director of Planning and Building Control to finalise the wording of conditions and deal any other issues which might arise.

|-----|--|
| 2.0 | <p>Characteristics of the Site and Area</p> <p>The site is located off the Blackstaff Road within an existing commercial/industrial area and comprises part of a former waste water treatment works that operated on the site until 2000 and has now been decommissioned. The M1 Motorway abuts part of the eastern boundary of the site. Blackstaff Road is located along the western boundary, Belfast City Council Civic Amenity Site and existing industrial/employment units are located to the immediate north of the site. An existing access road runs along the southern boundary of the site.</p> |
| 3.0 | <p>Description of Proposal</p> <p>3.1 The application seeks full planning permission for the partial redevelopment of former Waste Water Treatment Works to include the development of new Mechanical & Electrical (M&E) workshops, storage, changing facilities and ancillary offices (development to include three new buildings 1) the main hub building; 2) a store to hold an alternative bottled water supply; and 3) a generator store), access improvements, parking, service yards, storage areas, contractors compound, boundary fencing, cesspool, solar PV panels and landscaping.</p> <p>3.2 The application follows a Pre-Application Discussion (PAD) with officers.</p> |

| | |
|-------|---|
| 4.0 | Planning Assessment of Policy and Other Material Considerations |
| 4.1 | <p>Planning Assessment of Policy and Other Material Considerations</p> <p>Regional Planning Policy</p> <ul style="list-style-type: none"> • Regional Development Strategy 2035 (RDS) • Strategic Planning Policy Statement for Northern Ireland (SPPS) • Planning Policy Statement 3 (PPS 3) - Access, Parking and Movement • Planning Policy Statement 13 (PPS 13) - Transportation and Land Use • Planning Policy Statement 15 (PPS 15) - Flood Risk <p>Local Planning Policy Context</p> <ul style="list-style-type: none"> • Belfast Urban Area Plan (2001) BUAP • Draft Belfast Metropolitan Area Plan (2015) • Draft Belfast Metropolitan Area Plan (2004) <p>Other Material Considerations</p> <ul style="list-style-type: none"> • Belfast Agenda Community Plan • Developer Contributions Framework (2020) |
| 4.2 | <p>Planning History</p> <p>LA04/2022/0668/PAN - Partial redevelopment of former Kennedy Way Waste Water Treatment Works to include the development of new Mechanical & Electrical (M&E) workshops, storage, changing facilities, ancillary offices, access improvements, parking, service yards, boundary fencing and landscaping. It is proposed to develop three buildings on the site: 1) the main hub building; 2) a store to hold an alternative bottled water supply; and 3) a generator store, Sewage Treatment Works, Blackstaff Road, Belfast, BT11 9DT. PAN acceptable 11.04.2022</p> <p>LA04/2021/1325/PAD - Partial redevelopment of former NI Water operational land at Blackstaff Road / Kennedy Way, Belfast to include M&E workshops, storage, changing facilities and associated offices, access improvements, parking, service yards, boundary fence and landscaping, Sewage Treatment Works, Blackstaff Road, Belfast, BT11 9DT.</p> |
| 4.3 | Consultation Responses |
| 4.3.1 | <p>Statutory Consultation Responses</p> <p>Responses from statutory consultees are summarised below. Further detail concerning their feedback is provided in the main assessment section of the report, where appropriate.</p> <p>DFI Roads – No objection subject to conditions.</p> <p>NI Water – No objection. NI Water response confirms that until such times as there is available capacity at Belfast Waste Water Treatment and downstream wastewater network its proposed to discharge foul sewage to a cesspool which will be emptied via a tanker as necessary. Public water main available to serve the development.</p> <p>DFI Rivers Agency – No objection subject to a condition.</p> <p>DAERA (NIEA) – <i>Water Management Unit</i> - No objection subject to conditions. <i>Drinking Water Inspectorate</i> – No objection <i>Regulation Unit Land and Groundwater Team</i> – No objection subject to conditions. <i>NED</i> – no objection.</p> <p>Shared Environmental Services – No objection subject to conditions. SES advises that the project would not have an adverse effect on the integrity of any European site</p> |

| | |
|--------------|--|
| | <p>either alone or in combination with other plans or projects subject to mitigation measure proposed as conditions.</p> |
| 4.3.2 | <p>Non-Statutory Consultation Responses</p> <p>Responses from non-statutory consultees are summarised below. Further detail concerning their feedback is provided in the main assessment section of the report, where appropriate.</p> <p>Environmental Health – No objection subject to conditions. BCC Tree Officer – No objection subject to conditions. Economic Development Unit – Recommend that Employability and Skills during both the construction or operational phases of development should not be applied.</p> |
| 4.4 | <p>Representations</p> |
| 4.4.1 | <p>The application has been advertised and neighbours notified. No third party objections have been received.</p> |
| 5.0 | <p>Planning Assessment</p> |
| 5.1 | <p>The key issues to be considered in the assessment of this application are:</p> <ul style="list-style-type: none"> • The principle of the proposed use at this location • Impact on the character and appearance of the area • Compatibility with adjacent uses • Access, parking and traffic management • Environmental Considerations – Drainage, Contamination, Noise, Impact on Designated Sites/Natural Heritage Assets <p>An assessment of the above issues is set out below.</p> |
| 5.2 | <p>Background</p> |
| 5.2.1 | <p>The proposed development was the subject of a PAD process which included input from DFI Roads, BCC Tree Officer and Environmental Health.</p> |
| 5.3 | <p>Development Plan Context</p> |
| 5.3.1 | <p>Section 6(4) of the Planning Act (Northern Ireland) 2011 states that in making any determinations under the Act, regard is to be had to the local development plan, and the determination must be made in accordance with the plan unless material considerations indicate otherwise.</p> |
| 5.3.2 | <p>The adoption of the Belfast Metropolitan Area Plan (BMAP) in 2014 was declared unlawful as a result of a judgement in the court of appeal delivered on 18 May 2017. This means that the Belfast Urban Area Plan 2001 (BUAP) provides the statutory plan context for the area.</p> |
| 5.3.3 | <p>Draft BMAP 2015 (dBMAP 2015), in its most recent, post-examination form remains a significant material consideration when making planning decisions. It was at the most advanced stage possible prior to adoption. However, in assessing this application regard is also had to the provisions of draft BMAP which was published in 2004 (dBMAP 2004).</p> |

| | |
|-------|--|
| 5.3.4 | In dBMAP 2004 part of the site is identified as a Park and Ride site within the Belfast Metropolitan/Settlement Development Limit. In dBMAP 2015 the site is on unzoned land within the Belfast Metropolitan/Settlement Development Limit. Within the BUAP the site is unzoned land within the development limit of Belfast. |
| 5.3.5 | The Belfast Local Development Plan Draft Plan Strategy 2035 will guide future planning application decision making to support the sustainable spatial growth of the city up to 2035. The draft Plan Strategy has been subject to examination by the Planning Appeals Commission and the Council has been provided with a copy of their Report, together with a Direction from the Department for Infrastructure in relation to additional required steps before it can be adopted. Paragraph 1.10 of the Strategic Planning Policy Statement (SPPS) states that a transitional period will operate until such times as a Council's Plan Strategy has been adopted. Accordingly, whilst the Draft Plan Strategy is now a material consideration it has limited weight until it is adopted and during this transitional period existing policies will be applied including the SPPS and relevant PPSs. |
| 5.4 | Need for the Proposed Development |
| 5.4.1 | <p>The Planning Statement accompanying the application states <i>that 'The need for the Kennedy Way Hub building arises as a direct result of the requirement to upgrade the existing Belfast Wastewater Treatment Works, which is a key and strategic outcome of the DFI-led Living With Water Programme (the Belfast Strategic Drainage Infrastructure Plan). The Strategic Drainage Infrastructure Plan demonstrates that the Belfast WWTW needs to be significantly increased in capacity to facilitate economic growth, reduce the risk of flooding and achieve future stringent final effluent discharge consent standards in order to help improve the water quality of Belfast Lough. Without the Belfast WWTW upgrade, none of these objectives can be met.... Recent appraisals undertaken by NI Water have identified that the adjoining NI Water 'Bretland House' facility must be cleared to facilitate the main extension of the Belfast WWTW and Bretland House staff must therefore be relocated in order to facilitate the main Belfast WWTW upgrade works currently scheduled for 2024. The new Kennedy Way Hub building, as proposed in this planning application, will provide replacement facilities for those staff currently based at Bretland House whose relocation needs are not already being planned for through other NI Water projects. The provision of this alternative accommodation will allow Bretland House to be demolished and an Inlet Sewer diverted prior to the main Belfast WWTW works commencing.'</i></p> |
| 5.4.2 | <p>The Map below shows the existing Bretland House site (6 acres) adjacent to Belfast Waste Water Treatment Works, Duncrue.</p>  |

| | |
|-------|---|
| 5.4.3 | The need for a replacement facility as a result of relocation of Bretland House to facilitate the upgrade to Belfast Waste Water Treatment Works is a material consideration that supports the case for the proposed development. |
| 5.4 | Policy Context/Principle of Proposed Uses |
| 5.4.1 | The site is located within a primary commercial/industrial/ employment area. The proposal primarily comprises a Class B2 (Light Industrial Use) and Class B4 (Storage and Distribution) uses. Offices are also proposed within the Hub building. The applicant's team has advised that the function of the office space within the hub building is ancillary to its principal function and its purpose is to provide a supporting role to the main use of the building as an M&E workshop and that it would not be operationally possible to provide the office element in a town centre location with the main industrial use on a separate site elsewhere in the city, because the main industrial use relies on the support provided by the office staff. Officers are satisfied that the proposed office use is ancillary to the primary use of the main Hub building. |
| 5.4.2 | Policy PED 1 of PPS 4 – Economic Development in Settlements states that proposals for Class B2 and B4 uses will be permitted in an area specifically allocated for such purposes in a development plan or in an existing industrial / employment area provided it is of a scale, nature and form appropriate to the location. Elsewhere in cities and towns such proposals will be determined on their individual merits. The site is not zoned as an employment /industry area in either versions of draft BMAP or the BUAP. However, it is located adjacent to an existing employment/industry and commercial area. The proposal would support the strategic objectives of NI Water to upgrade the Belfast Waste Water Treatment Works. The proposed development is considered in principle to comply with Policy PED 1 and meet the core principles of the Strategic Planning Policy Statement for Northern Ireland (SPPS) and objectives of the Belfast Agenda. |
| 5.4.3 | <p>Policy PED 9 – General Criteria for Economic Development also applies to the proposed development and further assessment of the proposed development is set out below. Policy PED 9 states that <i>'a proposal for economic development use, in addition to the other policy provisions of this Statement, will be required to meet all the following criteria'</i>. Assessment of the criteria is set out below.</p> <p>(a) it is compatible with surrounding land uses; <i>It is considered that the proposal is compatible with the surrounding uses for reasons set out above.</i></p> <p>(b) it does not harm the amenities of nearby residents; <i>No residential properties are located in close proximity to the site.</i></p> <p>(c) it does not adversely affect features of the natural or built heritage; <i>NIEA Natural Environment Division (NED) has considered the impacts of the proposal on designated sites and other natural heritage interests and has no concerns subject to condition to ensure the satisfactory implementation of the Invasive Species management Plan. SES advises the proposal would not have an adverse effect on the integrity of any European site either alone or in combination with other plans or projects subject to mitigation measures which are included as recommended conditions. There are no built heritage assets in close proximity to the site. In summary the proposed development is not considered to adversely affect features of the natural or built heritage heritage.</i></p> <p>(d) it is not located in an area at flood risk and will not cause or exacerbate flooding; <i>The site is not located in a floodplain. Rivers Agency has considered the proposal against Policy FLD 1 and considers that it is not applicable to this development and raises no objections.</i></p> |

| | |
|--------------|--|
| | <p>(e) it does not create a noise nuisance; <i>Environmental Health has considered the impact of the proposed development and has no concerns relating to noise subject to a condition.</i></p> <p>(f) it is capable of dealing satisfactorily with any emission or effluent; <i>Environmental Health has considered the impact of the proposed development and has no objections relating to air quality/emissions subject to a condition. NI Water has no objections to the proposed development with regard to waste water infrastructure.</i></p> <p>(g) the existing road network can safely handle any extra vehicular traffic the proposal will generate or suitable developer led improvements are proposed to overcome any road problems identified; <i>DFI Roads has considered the traffic impact of the proposal and has raised no objections subject to conditions.</i></p> <p>(h) adequate access arrangements, parking and manoeuvring areas are provided; <i>DFI Roads has considered the proposed access, parking and manoeuvring arrangements and has raised no objection subject to conditions.</i></p> <p>(i) a movement pattern is provided that, insofar as possible, supports walking and cycling, meets the needs of people whose mobility is impaired, respects existing public rights of way and provides adequate and convenient access to public transport; <i>The access arrangements proposed include two access points and operation of a one way system for lorries and vans. The site is located close to Kennedy Way and a regular bus service is available in close proximity to the site. The development supports a range of modes of transport and is considered to meet the needs of those with impaired mobility and is convenient to public transport route.</i></p> <p>(j) the site layout, building design, associated infrastructure and landscaping arrangements are of high quality and assist the promotion of sustainability and biodiversity; <i>The site layout and building design are considered to be of an appropriate design quality. Photovoltaic (solar) panels are proposed on the roof which will promote sustainability. Landscaping proposals are proposed which will promote biodiversity in the area and serve to improve the character and appearance of the area.</i></p> <p>(k) appropriate boundary treatment and means of enclosure are provided and any areas of outside storage proposed are adequately screened from public view; <i>Security fencing (2.4m high paladin fencing) around the perimeter of the site is proposed and will provide an appropriate means of enclosure. Existing birch trees along the Blackstaff Road boundary will be retained along with new planting proposed within the site will provide an adequate degree of screening of storage areas.</i></p> <p>(l) is designed to deter crime and promote personal safety; <i>Perimeter fencing and gates at the access points entrance and exit to the site will secure the site and act as deterrent against crime. Car parking and access to the building/office is segregated from lorry loading/parking bays which will serve to promote personal safety for users.</i></p> <p>(m) in the case of proposals in the countryside, there are satisfactory measures to assist integration into the landscape. <i>Not applicable.</i></p> |
| 5.4.4 | The scale, nature and form of the development is considered appropriate to the location and compatible with surrounding uses. The proposal is considered to satisfy the criteria set out in Policy PED 1 and PED 9. |
| 5.5 | Scale, Design, Layout |
| 5.5.1 | <p>The proposed development comprises three buildings as set out below:-</p> <ul style="list-style-type: none"> • Hub – this is the main building accommodating mechanical and electrical (M&E) workshops, stores, welfare and administrative support; • The Alternative Water Supply Store (AWS) - stores water containers and bottles of drinking water deployed to the community in the event drinking water main supply is interrupted; and |

- Generator Store – This building stores mobile electrical generators used during water operations within the Belfast area and beyond.

5.5.2

The hub building is the main operational building proposed and comprises of three types of accommodation (as set out in the plan below) for mechanical and electrical workshops, workspace and meeting space, storage and changing facilities, toilets and canteen along with plant. The height of the Hub building varies across its length. The lowest part is 6.5 m rising to 8.8m. The M&E workshops are accessed from the eastern (rear) elevation whilst the ancillary offices are accessed from the western elevation thereby providing segregated safer entrances.

**5.5.3**

The Planning Statement states that ‘around 100 operational and maintenance staff will need to be assigned to a new hub location arising from the requirement to demolish Bretland House and that the Hub building will incorporate a management control centre and a major incident emergency control centre. It will also have welfare facilities and include a canteen, showers and laundry areas’. The Planning Statement further states that ‘It is operationally essential that the Hub management staff and operatives are accommodated at their operational base – the proposed new Kennedy Way Hub. Its proximity to the M1 motorway, makes it an ideal route access for the Hub’s staff vehicles. In the event of any major incident, its Major Incident Centre (Bronze Command) within the Hub building can be quickly activated with management control staff directing operations and with the ability to deploy staff and plant to site as rapidly as possible.’

5.5.4

The Alternative Water Supply building will be used for the storage of emergency bottled water (a minimum of 200 pallets) and a water tanker fast fill station. In addition, there will also be a large portable generator shed complete with a specialist ventilation system for generator testing. Portable generators stored at the Hub can be quickly moved to a remote site as necessary for use by operational staff. All of the proposed facilities will be provided in a secure protected site. The Kennedy Way Hub will be a working depot for maintenance of water and wastewater infrastructure throughout Belfast and areas beyond and the proposed business hours are 24/7.

5.5.5

The design of the Hub, Alternative Water and Generator Stores reflect typical warehouse type accommodation. All three buildings are of similar scale and appearance

| | |
|--------------|--|
| | to industrial buildings in the surrounding area and are long span portal framed buildings with composite cladding. Walls are proposed to be finished in grey cladding and blue/grey brick. Windows are proposed to be finished in grey aluminium frames, roof to be finished in grey cladding and doors in grey steel, grey roller shutter goods doors and glazed aluminium entrance doors. |
| 5.5.6 | The height, scale, massing, design, layout and materials of the proposed development are acceptable and compatible with the surrounding context and comply with the SPPS and PPS4. |
| 5.7 | Impact on the character and appearance of the area |
| 5.7.1 | The site is located in a predominantly commercial/industrial/employment area. Belfast City Council Civic Amenity Site is located to the immediate north along with existing industrial/employment units. The Westwood Shopping Centre is located to the west. Lands abutting the site to the south and southeast are owned by NI Water and form part of the former Waste Water Treatment Works. The M1 motorway runs along the eastern boundary of the site. The nearest existing residential property is located approximately 115 to the south at Stockmans Crescent. The Traffic impact has been considered by DFI Roads who raise no objection. Environmental Health has considered amenity impacts and are content that no adverse impact by way of noise, odour air quality would arise from the development. Japanese knotweed and Himalayan Balsam were identified as being present on the site and the applicant has submitted an Invasive Species Management Plan (ISMP) which sets out steps to control and manage the species to facilitate the proposed development. Measures have been implemented to eradicate the species and this process is ongoing. The (ISMP) has been reviewed by NIEA Natural Environment Division who raise no objection and recommend a condition ensuring that the development adheres to the ISMP. |
| 5.7.2 | It is considered that the proposed development will not give rise to adverse impacts and is compatible with the surrounding area and complies with the SPPS. |
| 5.8 | Access Parking and Traffic Management |
| 5.8.1 | Two access points to the site are proposed from the Blackstaff Road and a one-way access route for lorries and vans is proposed through the site segregating lorries and vans from cars/staff traffic. Parking for 64 cars/vans and 11 HGV lorries is proposed and includes 6 electrical charging points. A sheltered cycle store and providing parking for bicycles is also proposed on site. |
| 5.8.2 | DFI Roads has no objections to the proposed development subject to conditions which are set out below. The proposal is considered to comply with the SPPS and PPS 3. |
| 5.9 | Environmental Considerations |
| | Drainage |
| 5.9.1 | The application is supported by a Flood Risk Assessment and Drainage Assessment. The proposal has been considered against policies FLD 1-5 of Revised PPS15. DFI Rivers have raised no objections under Policies FLD 1, 2, 3, 4 and 5 subject to a condition seeking the submission of a final drainage plan prior to construction. |
| 5.9.2 | NI Water has no objection to the proposed development and advises that although Belfast WWTW and catchment are both operating at capacity this proposal can be approved on the basis of no additional loading. It is proposed to discharge foul sewage to a cesspool which will be emptied by a tanker as necessary. This arrangement will be |

| | |
|---------------|---|
| | in place until such times as there is capacity at both the WWTW and wastewater network. NI Water advise that there is a public water main within 20m of the proposed development boundary which can adequately service these proposals. |
| 5.9.3 | Contamination The application is supported by a Land Contamination Assessment which has been considered by both DAERA, NIEA and Environmental Health. Neither have raised objections and both have provided conditions/informatives if permission is granted. |
| 5.9.4 | Noise The application is supported by a Noise Impact Assessment which has been considered by Environmental Health who has provided a condition should permission be granted. |
| 5.9.5 | Air Quality The application is supported by an Air Quality Impact Assessment which has been considered by Environmental Health which has no objection subject to a condition as set out below. |
| 5.9.6 | Odour The application is supported by an Odour Impact Assessment which has been considered by Environmental Health who has no objection. |
| 5.10 | Impact on Designated Sites/Natural Heritage Assets |
| 5.10.1 | The proposed development is located adjacent to an unnamed watercourse that connects to the features in Belfast Lough via the Turf Lodge Stream and Lagan System and therefore there is potential that the development could impact on a number of designated sites. |
| 5.10.2 | In accordance with Regulation 43(1) of the Conservation (Natural Habitats, etc.) (Northern Ireland) 1995 (as amended) Shared Environmental Services (SES) on behalf of the Council has carried out an appropriate assessment and having considered the nature, scale, timing, duration and location of the project, SES advises that the development would not have an adverse effect on the integrity of any European site, either alone or in combination with other plans or projects. In reaching this conclusion, SES has assessed the manner in which the project is to be carried out including mitigation measures. This conclusion is subject to mitigation measures being conditioned in any approval which require the development to be carried out in accordance with the drainage plan submitted and the requirement for at least a 10m buffer between the location of any refuelling, storage of oil/fuel, concrete mixing and washing areas, storage of machinery/material/spoil etc. and any watercourse or drains present onsite or adjacent to the site. SES considers that adherence to these conditions will negate any potential pollution issues at both construction and operational phases from affecting connected European Site features. Both conditions are set out in full below. |
| 5.10.3 | Belfast City Council in its role as the competent Authority under the Conservation (Natural Habitats, etc.) Regulations (Northern Ireland) 1995 (as amended), and in accordance with its duty under Regulation 43, has adopted the HRA report, and conclusions therein, prepared by Shared Environmental Service, dated 01/02/2023. This found that the project would not have an adverse effect on the integrity of any European site. |

| | |
|--|--|
| 5.11 | Pre-Application Community Consultation |
| 5.11.1 | In accordance with the requirements of Section 27 of the Planning Act (NI) 2011, the applicant served a Proposal of Application Notice (PAN) on Belfast City Council on 25 th March 2022 (LA04/2022/0668/PAN). Belfast City Council responded confirming that the PAN and associated approach met the requirements of Section 27 of the Planning Act and was acceptable subject to additional consultation with the MP for West Belfast. A digital public consultation event via a dedicated NI Water website was proposed between 02 and 20 May 2022. |
| 5.11.2 | A Pre-Application Community Consultation Report has been produced to comply with the statutory requirement laid out in Section 28 of the Planning Act (Northern Ireland) 2011. The purpose of a PACC report is to confirm that pre-application community consultation has taken place in line with statutory minimum requirements. The report has confirmed advertising for the public event and that the public event (digital public consultation event) took place in accordance with section 5 of The Planning (Development Management) Regulations (Northern Ireland) 2015. The report also confirmed that a leaflet was distributed to neighbouring properties. The report states that feedback was limited to one response which raised issues regarding additional traffic on Blackstaff Road. |
| 5.11.3 | The applicant's responded to the issue raised by advising that the application is accompanied by a Transport Assessment Form (TAF) that considers the impact of the development on traffic congestion and road safety which concludes that <i>"the low number of vehicles generated by the proposed development will have a minimal transport impact during AM and PM peak periods"</i> . The response advises that the TAF was also submitted in draft to DFI Roads via the PAD process, who raised no objection to the draft development proposal. |
| 5.11.2 | The Pre-Community Consultation Report submitted satisfactorily demonstrates that the applicant has complied with the requirements of Sections 27 and 28 of the Planning Act (NI) 2011 and Section 5 of The Planning (Development Management) Regulations (Northern Ireland) 2015 and has adhered to Council recommendations during the PAN process. The PACC report is considered acceptable. |
| Neighbour Notification Checked Yes | |
| Summary of Recommendation: Having regard to the development plan, relevant policy context and other material considerations, the proposed development is considered acceptable and it is recommended that full planning permission is granted subject to conditions. Delegated authority is sought for the Director of Planning and Building Control to finalise the wording of conditions and deal any other issues which might arise. | |
| Draft Conditions: 1. The development hereby permitted shall be begun before the expiration of 5 years from the date of this permission. Reason: As required by Section 61 of the Planning Act (Northern Ireland) 2011. 2. All landscaping works shall be carried out in accordance with the approved details on Drawing No. 16C – Planting Plan. The works shall be carried out prior to the occupation of | |

any part of the development unless otherwise agreed in writing by the Council. Any proposed trees or plants indicated on the approved scheme which, within a period of five years from the date of planting, die, are removed or become seriously damaged, diseased or dying shall be replaced during the next planting season with other trees or plants of a location, species and size, details of which shall have first been submitted to and approved in writing by the Council.

Reason: In the interests of the character and appearance of the area

3. All trees and planting within the site shall be retained unless shown on the approved drawings as being removed. Any existing trees or planting to be retained as indicated on the approved drawings which, within a period of five years from the date of planting, die, are removed or become seriously damaged, diseased or dying, shall be replaced during the next planting season with other trees or plants of a location, species and size, details of which shall have first been submitted to and approved in writing by the Council.

Reason: In the interests of visual amenity.

4. Prior to commencement all tree protective measures, protective barriers (fencing) and ground protection shall be erected or installed in accordance with the British Standard 5837: 2012 (section 6.2) on any trees to be retained within the site, and must be in place before any materials or machinery are brought onto site for demolition, development or soil stripping. Protective fencing must remain in place until all work is completed and all associated materials and equipment are removed from site.

Reason: To ensure the protection of, and to ensure the continuity of amenity afforded by any existing trees to be retained within the site and on adjacent lands.

5. If roots are accidentally damaged the Council must be immediately notified in writing and given the opportunity to inspect the damage before it is covered over. The roots must be wrapped in wet hessian wrap until the arrival of an arborist or Council tree officers. Remedial works to roots/trees shall be submitted to and agreed in writing by the Council. The development shall not proceed unless in accordance with the approved details.

Reason: To ensure the protection of, and to ensure the continuity of amenity afforded by existing trees.

6. No storage of materials, parking of vehicles or plant, temporary buildings, sheds, offices, service runs / cables or fires within the RPA of trees within the site and adjacent lands during the construction period.

Reason: To avoid compaction within the RPA of existing trees to be retained.

7. The Kennedy Way Hub Tree Survey Report [Arboricultural Method Statement and Plan] by M. Large Tree Services dated 16 Sept 2022 submitted in support of the application shall be adhered to in full during the construction process.

Reason: To safeguard and enhance the character and amenity of the site and locality and to avoid any irreversible damage to retained trees.

8. No development shall commence (other than site clearance, enabling works or works to fulfil this condition) until a Detailed Remediation Strategy has been submitted to and approved in writing by the Council. The Remediation Strategy shall consider the MCL Consulting Ltd report entitled 'Project Number: P2565_2_Issue 4, Phase 3 Remediation Strategy, Kennedy Way, Belfast, Client: McAdam Design, Issued: January 2023'. The Remediation Strategy

shall follow best practice and must demonstrate how the identified contaminant linkages are to be demonstrably broken and no longer pose a potential risk to human health. It must also detail how the proposed remedial works are to be verified. The development shall not be carried out unless in accordance with the approved Remediation Strategy.

Reason: To ensure that any contamination within the site is appropriately dealt with, in the interests of human health.

9. Prior to operation of the development, a Verification Report shall be submitted to and approved in writing by the Council. The Verification Report must be in accordance with Environment Agency guidance, British Standards and CIRIA industry guidance. It must demonstrate that the mitigation measures outlined in the agreed Remediation Strategy have been implemented and have broken the relevant contaminant linkages and that the site no longer poses a potential risk to human health.

Reason: To demonstrate that the required remedial measures have been incorporated into the development, in the interests of human health.

10. If during the carrying out of the development, or through the completion of any updated risk assessment for the proposal, new contamination is encountered that has not previously been identified, all related works shall cease immediately, and the Council shall be notified immediately in writing. This new contamination shall be fully investigated in accordance with current industry recognised best practice. In the event of unacceptable human health risks being identified, a Remediation Strategy and subsequent Verification Report shall be submitted to and agreed in writing by the Council, prior to the development being occupied or operated. The Verification Report shall be completed by competent persons in accordance with best practice and must demonstrate that the remediation measures have been implemented and that the site is now fit for end-use. The development shall be carried out in accordance with the approved details.

Reason: To ensure that any contamination within the site is appropriately dealt with, in the interests of human health and for the protection of environmental receptors to ensure the site is suitable for use.

11. Prior to operation of the development, alternative means of mechanical ventilation that is suitably acoustically attenuated shall be installed to the hub building in accordance with section 4.1.1 of the RPS Group report entitled '*Noise Impact Assessment, NI 2588 Kennedy Way Belfast*', referenced NI 2588, dated June 2022.

Reason: Protection of amenity.

12. In the event that any substantial centralised combustion sources (boilers, CHP, biomass or generators) are proposed and there is a risk of impact at relevant receptor locations as per the criteria detailed within the Environmental Protection UK and Institute of Air Quality Management, Land-use Planning & Development Control: Planning For Air Quality (January 2017), an updated Air Quality Impact Assessment shall be submitted to and approved in writing by the Council prior to the installation of the plant. The assessment shall include details of the combustion plant to be installed, to include emission rates and flue termination heights of the proposed combustion systems and must demonstrate that there will be no exceedances of the Air Quality Strategy objectives at relevant human receptor locations, associated with operation of the proposed combustion plant and with the overall development. The development shall be carried out in accordance with the approved details.

Reason: Protection of human health against adverse air quality impact.

13. The dust management measures, as detailed within Appendix D (*Dust Management Plan*) of the *RPS Group Report entitled 'Air Quality Impact Assessment, Partial Redevelopment of Former NI Water Operational Land at Blackstaff Road/Kennedy Way*, referenced NI 2588, dated July 2022 shall be implemented throughout the duration of the construction phase of the development.

Reason: Protection against adverse air quality impacts.

14. A suitable buffer of at least 10m must be maintained between the location of any refuelling, storage of oil/fuel, concrete mixing and washing areas, storage of machinery/material/spoil etc. and any watercourse or drains present onsite or adjacent to the site.

Reason: To protect the features of European Sites indirectly hydrologically connected in Belfast Lough from adverse effects.

15. The drainage for the site shall be constructed in accordance with the approved drainage plan on drawing No. 17D – Proposed Drainage Layout (BRA-MCA-ST1-00-DR-CP-2000 Rev P6).

Reason: To protect the features of European Sites indirectly hydrologically connected in Belfast Lough from adverse effects.

16. Prior to the construction of the drainage network, a final drainage assessment, compliant with FLD 3 and Annex D of PPS 15, shall be submitted to and agreed in writing by the Council. The Final Drainage Assessment shall demonstrate the safe management of any out of sewer flooding emanating from the surface water drainage network, agreed under Article 161, in a 1 in 100 year event. The development shall not be carried out unless in accordance with the approved details.

Reason – In order to safeguard against surface water flood risk to the development and manage and mitigate any increase in surface water flood risk from the development to elsewhere.

17. No development shall commence until the applicant has submitted evidence in writing to the Council for its agreement demonstrating that the risks to groundwater and other environmental receptors due to on-site contamination of the ground and groundwater have been effectively assessed. This evidence should include but not be limited to:

- Groundwater quality monitoring data and a detailed quantitative risk assessment to investigate the risks to groundwater from hydrocarbon contamination identified at the site (WS01),
- If unacceptable risks to groundwater are identified provision of remedial criteria as soil and groundwater concentrations that would not pose a risk to receptors. The remedial criteria are required to be derived through quantitative risk assessment based on the conceptual site model.

If unacceptable risks to receptors are identified a remediation strategy will be required to address those risks.

Reason: Protection of environmental receptors to ensure the site is suitable for use.

18. The development hereby permitted shall not commence until a detailed remediation strategy to address all unacceptable risks to environmental receptors identified from Condition 17. This strategy must be submitted to and agreed in writing by the Council and should identify all unacceptable risks on the site, the remedial objectives/criteria and the measures which

are proposed to mitigate them (including maps/plans showing the remediation design, implementation plan detailing timetable of works, remedial criteria, monitoring program, etc).

Reason: Protection of environmental receptors to ensure the site is suitable for use.

19. The development hereby permitted shall not be occupied until the remediation measures as described in the remediation strategy submitted under Condition 17 have been implemented to the satisfaction of the Council. The Council must be given at least 2 weeks written notification prior to the commencement of remediation work.

Reason: Protection of environmental receptors to ensure the site is suitable for use.

20. In the event that piling is required, no development or piling work should commence on this site until a piling risk assessment, undertaken in full accordance with the methodology contained within the Environment Agency document on "Piling and Penetrative Ground Improvement Methods on Land Affected by Contamination: Guidance on Pollution Prevention", has been submitted in writing and agreed with the Planning Authority. The methodology is available at:

<http://webarchive.nationalarchives.gov.uk/20140329082415/http://cdn.environment-agency.gov.uk/scho0501bitt-e-e.pdf>

Reason: Protection of environmental receptors to ensure the site is suitable for use.

21. The applicant must adhere to the agreed Invasive Species Management Plan (ISMP) for this site and Waste Transfer Notes must be retained where they are required.

Reason: To control and reduce the spread of non-native species.

22. The development shall not become operational until the weather protected cycle parking has been provided in accordance with the approved plans.

Reason: To ensure acceptable cycle parking facilities on the site and to encourage alternative modes of transport to the private car.

23. The development shall not become operational until hard surfaced parking areas have been provided and permanently marked in accordance with the approved plan. These facilities shall be permanently retained.

Reason: To ensure acceptable parking facilities on the site.

24. Pedestrian crossing points including tactile paving shall be provided at all road junctions in accordance with the DETR / Scottish Office publication "Guidance on the use of Tactile Paving Surfaces".

Reason: In the interests of pedestrian safety.

25. The visibility splays, shall be provided in accordance with Drawing Nos. 14C and 26B, prior to the operation of any other works or other development hereby permitted.

Reason: To ensure there is a satisfactory means of access in the interests of road safety and the convenience of road users.

26. The area within the visibility splays and any forward sight line shall be cleared to provide a level surface no higher than 250 mm above the level of the adjoining carriageway before the development hereby permitted becomes operational and such splays shall be retained and kept clear thereafter.

Reason: To ensure there is a satisfactory means of access in the interest of road safety and the convenience of road users.

Notification to Department (if relevant) - Not Required
