

Appendix 1 - Details of our current references to an £80 fine

Metal signs on lampposts

The erection of signs across parks, open spaces and in public areas in the street is one that has had different approaches across BCC over many years. Different teams and units in historical differing Departments, even before LGR, means there is no central record of the locations, sizes or content of the existing signs.

Alley Gates

Nearly every alley gate has at least 1 metal sign on it – mostly A3 size. We do have a full list of all alley gate locations.

Council street bins

Some bins have yellow stickers with details of the dog fouling and littering fines. These would need to be over-stickered.

Council vehicles

Some vans have details of the fines on their side panels / rear doors. Again over-stickering would be required.

Online

We have an internal video clip on responsible dog ownership which refers to the £80 fine. All other online references to £80 would be straightforward to change.

Fixed Penalty Notice Documentation

This would be easy to amend with immediate effect.

Leaflets / banners etc.

We would stop using any leaflets / banners that refer to £80 and update them on a rolling programme within existing budget. This will be relatively straightforward with most work done internally via Reprographics.
