Final Artwork Designs

USI delivered 300 engagement kits to children in the area during June and July 2020. From the stories and drawings completed and via engagement with the children and local representatives Usfolk then illustrated the kids aspirations. The prompts were around community, natural elements and the importance of contribution to make the neighbourhood more vibrant.

The three sample tiles below show the designs which will be implemented, with the fourth outlining how they will look wrapped on the lamposts.
