

Electric Charging Ports

This Council notes new legislation being brought forward in other parts of the United Kingdom requiring electric charging points to be included in new home and office developments, and believes that this should be introduced in Northern Ireland at the earliest opportunity, in a partnership between the public and private sectors. The council will agree;

- I. To write to the Minister for Infrastructure outlining the council position and requesting the departmental position, including any discussions about this matter to date;
- II. To write to the Minister for Economy outlining the council position and requesting the departmental position, including in relation to how it may fit with the ongoing energy strategy consultation; and
- III. To Members receiving a report from the Council's Legal and Civic Services and Planning Departments indicating how this could be best considered in the criteria for planning applications.

Proposer: Alderman Dorrian

Seconder: Councillor Brooks

(To be debated by the Council)
