

Fast-Track Cities

“This Council recognises that ending the HIV epidemic requires a comprehensive approach that allows all those in need, to access quality lifesaving treatment, enhances prevention, care, and support services for HIV, tuberculosis (TB), and viral hepatitis. Council further recognises that integrating these services into sexual, reproductive, and mental health services is critical to achieving universal access to health care.

This Council seeks to eliminate stigma and discrimination by building on scientific evidence. Understanding that successful HIV treatment and viral suppression prevents HIV transmission which can help reduce stigma and encourage people living with HIV to initiate and adhere to HIV treatment.

Therefore, this Council will sign up to the Paris Declaration supporting the Fast-Track Cities aim of eliminating the stigma associated with HIV and AIDS as well as aiming for no new HIV diagnosis by 2030.”
